

SKILLS

Communication	Spanish native, English B2 in Bullats, Studied French for three years in high school
Web Development	SASS/LESS, Web Components, Node, SpringBoot, Express, React, Next, Angular, Advanced CSS, NPM, Yarn, WebPack, React Native, Electron, VS Code, Advanced HTML, GitHub, Rest API's, GraphQL, Jest, JavaScript, TypeScript, Responsive Design, UI/UX Design Principles, Browser Developer Tools, Cross-Browser Compatibility, RESTful Web Services, GraphQL, Microservices Architecture, Server-less Architecture
Programming Languages and Frameworks	Java, C#, Python, Flask
Database and Data Management	MySQL, MongoDB, Data Structures
Development Operations (DevOps) and Tools	Azure DevOps, Git, Docker, Kubernetes, CI/CD, AWS, GCP, DevOps, Azure
Methodologies and Practices	Software Architecture, Design Patterns, Agile Methodologies, Code Versioning, MVC, MVVM, Clean Code, Testing, Scrum, Jira, Project Planning and Scheduling
Leadership and Management	Team Building and Mentoring, Conflict Resolution, Negotiation Skills, Strategic Planning, Agile Leadership, Performance Management, Emotional Intelligence
Certifications	AWS Cloud Practitioner, AWS Cloud Developer

TECHNICAL EXPERIENCE

Tech Lead Neostella	[Mes] 2024 — Present Guadalajara, Jalisco
- Led the end-to-end architecture and development of a greenfield Data Warehouse project, utilizing a monorepo structure to maximize development efficiency and code sharing. - Designed a highly scalable NoSQL database schema to aggregate disparate data sources, enabling flexible field mapping and maintaining a single source of truth. - Accelerated delivery by 25% through the implementation of custom AI Agents and Cursor rules, automating documentation, backend standards, and frontend scaffolding. - Reduced production bugs by 20% by establishing a robust QA workflow and a multi-environment CI/CD pipeline (Dev, QA, Staging, Prod). - Orchestrated a successful MVP release in under 3 months by aligning technical roadmaps with client business priorities and stakeholder requirements. - Mentored and upskilled the engineering team on AWS cloud services, fostering a DevOps culture and enabling autonomous infrastructure management. - Optimized the development lifecycle by maintaining a <3-hour PR review SLA, ensuring high code quality without creating bottlenecks in the sprint velocity. - Engineered a serverless infrastructure leveraging AWS Lambda, S3, SES, Cognito, CloudFront, and CloudWatch, ensuring secure and cost-effective operations.	
AWS FullStack Developer IBM	Jul 2024 — Present Guadalajara, Jalisco
- Developed and implemented core backend services and business logic in Java, leveraging AWS technologies. - Designed and built scalable systems using Event Sourcing patterns for robust data management. - Managed and optimized data persistence layers, primarily utilizing AWS DynamoDB for high performance. - Automated deployment pipelines from GitHub repositories to AWS Lambda functions (Java-based) exposed as REST endpoints. - Configured and maintained infrastructure-as-code using YAML specifications (e.g., AWS SAM or Serverless Framework). - Updated and managed project dependencies to ensure security, performance, and stability in Java environments. - Created and maintained comprehensive unit tests for Java backend functions and API endpoints to ensure code reliability. - Transformed and structured JSON API responses to align with specific frontend requirements. - Collaborated with frontend teams to integrate backend services and optimize data flow. - Integrated various AWS services (e.g., SQS, SNS, S3, API Gateway) to support complex Java-based application architectures.	
Development Team Leader iNBest	Jan 2022 — Jul 2024 Guadalajara, Jalisco
- Led full-stack development using React (TypeScript) for the frontend and Express (TypeScript) for the backend, delivering responsive and maintainable web applications. - Developed the front-end web application with a chat interface for the ‘Tesseract’ project, integrating Gen AI and AWS Tesseract for real-time query resolution and enhanced user interaction.

Jorge Salgado

FullStack Developer | Team Leader

Portfolio: jorgesalgado.dev
github.com/JorgeSalgado0999
LinkedIn

- Guided and motivated a development team to consistently surpass project goals and deadlines by implementing structured goal-setting approaches.
- Fostered innovation and continuous improvement, resulting in more efficient development practices and higher-quality deliverables through team contributions of novel ideas.
- Implemented communication and feedback mechanisms, significantly boosting team productivity and project execution efficiency.
- Utilized a proactive leadership style, ensuring team adaptability and resilience in meeting changing project demands.
- Cultivated strong client relationships through open communication channels, increasing client satisfaction and retention.

Full Stack Developer

Jul 2022 - Jul 2023

Bradescard

Guadalajara, Jalisco

- Managed the full-cycle migration from Legacy Access to a SQL database, developing the frontend in React and backend in Express.
- Orchestrated project management via Jira, implementing custom authentication, session management, and RBAC (Role-Based Access Control).
- Streamlined requirement gathering and system architecture planning, ensuring 100% alignment with enterprise quality standards.

Full Stack Developer

Nov 2021 - Jan 2022

iNBest

Guadalajara, Jalisco

- Built websites using React and Angular.
- Created multiple REST APIs with Express and Flask.
- Constructed a CRM system from scratch, employing React, Express, Python, and various AWS services.
- Developed a comprehensive digital ecosystem with centralized data in one database, encompassing multiple web and mobile apps and diverse analytical dashboards.
- Produced several Progressive Web Apps (PWAs) using Vite, React, Ionic, and Angular.
- Crafted websites using Next.js, Express, and AWS.
- Established a content management system (CMS) with Strapi for a website.
- Designed a web application managing permissions for Power Bi dashboards using React and Express in Azure.
- Created a Web Billing Portal using React, Express, C#, and Conpaq.
- Improved project delivery times by 25% through the implementation of standards, templates, and pre-built components.

WordPress Developer

Sep 2020 - Dec 2020

Fundacion HACE

Guadalajara, Jalisco

- Redesigned the organization's WordPress website during my social service at Fundacion HACE to better reflect its identity and values, resulting in an enhanced online presence.
- Revamped the blog for improved aesthetics and usability, creating a more engaging user experience and better representing the organization's values.
- Initiated the development of an e-commerce platform to expand opportunities for foundation support, ultimately strengthening their online presence and outreach.

EDUCATION

Bachelor of Computer Science, Instituto Tecnológico y de Estudios Superiores de Monterrey
Guadalajara, Mexico.

Graduated in June 2023
